Kids Count

Too!

Why is the Census Important?

The Census Helps Communities

Census results help determine how **BILLIONS** of dollars in federal funding flow into states and communities each year.

Census numbers provide money for education, housing, health, and public safety.

The more accurate the number of people counted, the more help our communities get.

How can YOU make sure you are counted?

Make sure the adult you live with fills out their 2020 Census! Adults can respond to the census by phone, internet, or mail.

Make sure you are counted to help your community!

23%

Out of all the people who were counted in the last census in 2010, 23% of them were ages 18 and under. That's around 1,491,274 kids!
